

NAV BAL DIWAS QUIZ COMPETITION

October 30, 2022

QUIZ FORMAT AND RULES

- 1 There are 4 category rounds in this quiz.
Each round has 8 questions. Questions are numbered from 1 to 8. In each round, the team at one end will start, and choose a number between 1 and 8 inclusive. The team choosing the question has 30 seconds to answer them.
- 2 If the team fails to provide an answer within the allotted time or if the provided answer is incorrect, the question passes on to the next team. For questions that are passed, teams are allotted 20 seconds to provide an answer.
- 3 If none of the teams answer the question, it will be passed to the audience.
- 4 Each successive team will choose a previously unchosen number during their turn. For example, if Team A has already chosen question 1 in this round, other teams can only choose between questions 2 to 8.
- 5 If a team is answering a question and the time passes, then the team gets to complete the answer and is awarded points for the right answer.
- 6 There is no negative marking for wrong answers. So teams are encouraged to venture a guess for each question.
- 7 For each right answer, 10 points will be given. Wrong answers will obtain 0 points.
- 8 If there are two parts of the question, 5 points are provided to each correct answer. If a team answers only 1 of the two parts correctly, then the next team can attempt to answer the remaining correct answer, and receive 5 points.
